

Date: 02 July 2026	Team ID: SB-7429
Project Name: Credit Card Approval Prediction using Machine Learning	Maximum Marks: 3 Marks

BRAINSTORMING & IDEA PRIORITIZATION TEMPLATE

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	K. Mahesh	Layered policy-based rules engine overrides filters	Rules Engine	Group 1
2	P. Ramesh	SMOTE over-sampling pipeline to balance default distribution	Data Sampling	Group 2
3	S. Suresh	Standard feature scaling pipeline for variable equivalence	Preprocessing	Group 3
4	V. Dinesh	Probability threshold calibration using Precision-Recall curve	Model Tuning	Group 4
5	M. Naresh	Real-time Flask underwriting outcomes dashboard	UI Dashboard	Group 5
6	K. Mahesh	Local scikit-learn model fallback to bypass computer policy blocks	Compliance	Group 6

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority Selected (Yes/No)
Group 1	Policy Override Rules Layer	High	High	Yes
Group 2	SMOTE Class Balancing	High	High	Yes
Group 3	Standard Feature Scaling Pipeline	High	High	Yes
Group 4	Probability Threshold Calibration	High	High	Yes
Group 5	Interactive Flask Web Dashboard	High	High	Yes
Group 6	Local Model Compliance Fallback	High	High	Yes
