

Date: 02 July 2026	Team ID: SB-7429
Project Name: Credit Card Approval Prediction using Machine Learning	Maximum Marks: 1 Mark

PROJECT DEMO PLANNING TEMPLATE

Project Demo Planning

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem	Outline operational bottlenecks, credit NPA risks, and project objectives.	2 mins	K. Mahesh (Leader)
2	System Architecture	Explain the hybrid decisioning pipeline (Policy Layer 1 and ML Layer 2).	2 mins	P. Ramesh
3	Model Optimization	Discuss Stratified Join ETL, SMOTE balancing, and PR calibration.	3 mins	S. Suresh
4	Live Feature Demo	Run Scenario A (Low-Income), B (Student), and C (Approved manager).	5 mins	V. Dinesh
5	Testing & Deployment	Review automated unit test logs and Render hosting setup.	2 mins	M. Naresh
6	Q&A; Session	Respond to stakeholder inquiries and discuss future roadmap.	3 mins	All Team Members

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Focus on reducing application latency and credit defaults.
2	Solution Overview	Highlight the security compliance of scikit-learn's Random Forest classifier.
3	Live Feature Demonstration	Verify policy short-circuits and ML scoring in real-time.
4	Q&A; Session	Be prepared to address questions on SMOTE synthetic generation and F1-score threshold scaling.
